Organic, Pure, Unfiltered Honey - Wound Care for 5,000 Years.

Look to the ancients. Do not let their wisdom fade. Even with our great technologic progress, honey still far outpaces almost all wound care options including silver sulfadiazine in virtually all categories. When combined with turmeric to provide additional anti-inflammatory and anti-microbial properties, VetiHoney offers a new standard of natural wound care backed by thousands of years of use and extensive research.

It's time to surpass human medicine. Visit vetxps.com/vetihoney for more.
